Dear sir: - Mr. DR. D. R. Mundhody

Subject : Supply, Installation & Commissioning Lift at Passenger

Reference : Personal visit to our site

We thank you for your enquiry given to us for installation of 'Sai Elevators passengers lift at your project as referred above. Based on the same, we are pleased to submit our detailed our techno-commercial offer along with all the technical specifications of the lifts and the options available.

We undertake this opportunity to introduce ourselves as one of the fastest growing Sai Elevators manufacturing Govt. approved company in Maharashtra with latest high Advance Global Technology of microprocessor based lifts used for all purpose. We have equipped with an unmatched maintenance infrastructure including quality control personal, which ensures the reliability of the equipment installed by us.

We trust our offer with your requirements. Kindly revert for any further clarifications. We look forward to hear from you.

Email: saielevator0@gmail.com OR Call: +91-9604965992 / 7798189700 round the clock.

Thanking and assuring you of our best services at all times.

Yours Sincerely,

For Sai Elevators

Gopal pawar

- The Buyers/Clients shall not use the lift without having obtained a working license from the competent authority and or having paid full payment to the supplier/Contractor.
- d) Subject to Pune Jurisdiction only.

To be provided by the client:

- 1) Three Phase power and other electrical requirements as per our electrical power and switchgear requirement.
- 2) PWD CHARGES RS 15,000/- EXTRA

SAI ELEVATORS

(SAI ENTERPRISES)

Government Authorised Electrical & Elevators Contractor

Head.Off. : Shop No.02, Awarshine Apartment, Pandav Nagri, Indira Nagar, Metro Zone, Nashik - 422 009. Mob.: 7798189700

TECHNICAL SPECIFICATION

DATE: 9/8/12

1. MOTOR :- Specially designed for heavy lift duty run smoothly & spark less under load up to its maximum capacity in either direction, or equivalent suited to the service proposed with ample power to deal with occasional overload.

2. WARM GEAR:- winding of Gear is the worm wheel type, fitted with thrust ball bearing of foreign make. The worm shaft is turned on a single forge tensile steel & wheel rim of centrifugally cast phosphor bronze, mounted in cast iron dust & leak proof housing to ensure the highest efficiency & noiseless running. The shaft is supported with bearing designed to give a long life. Efficient lubrication of all moving parts in the gear unit is adequately provided together with oil feed channels.

3. MAIN STEEL WIRE ROPE :- USHA MARTINE 8 X 19 X3 nos.

The main suspension rope will be a steel traction rope of the adequate construction. The ropes will be facilitated to the top car frame and to the counter weight frame by means of "I" Bolts with adequate springs and suitable fixtures to minimize jerks at starting and stopping.

4. OVER SPEED GOVERNOR SAFETY:-

This will be made of structural steel to support the car platform and enclose with safety device underneath the frame. Safety will be provided to stop the lift whenever excessive descending speed is attained. This will be achieved by means of governor installed in the machine room connected to the car by means of steel wire rope with necessary devices. Safety gear contact will be mounted on the car top frame to cut off the control supply and stopping the lift prior to the safety gear.

5. CAR GUIDE SHOE RAILS AND SHOE:-

will be heavy duty 'T' section steel guide machined throughout the length of the shaft complete with fish plates, firmly fixed on M.S. bracket with guide clips.

6. COUNTER WEIGHT GUIDES:-

Will be throughout the length of the shaft complete with fish plates, firmly fixed on M.S. bracket with guide clips.

7. BUFFERS:-

Coiled spring buffer for car and counter weight will be fitted in the pit on concrete blocks with suitable channel to take the full load of the car or counter weight for lifts up to a speed of 2m /sec.

8. COUNTER WEIGHT :-

Cast iron balance weight will be provided of neat appearance fitted inside a steel frame & arranged so as counter balance the weight of car, plus on help of the usual working load. The counter frame is fitted with four adjustable guide shoes and adequate arrangements will be provided for suspension rope.

9. CAR:-

Width, depth and height will be as per the rules, and regulation of the Mumbai lift Act/I.S.I. the quality of platform and cabin will be of a very high standard for long life.

SAI ELEVATORS

(SAI ENTERPRISES)

Government Authorised Electrical & Elevators Contractor

Off. : Shop No. 02 CONTROL ROOM, Pandav Nagri, Indira Nagar, Metro Zone, Nashik - 422 009. Mob.: 7798189700

The control panel will be operated on 110 Volts D.C. with solid state components for trouble free, noiseless operation with maximum efficiency and longer life. This will be mounted on the floor or wall with phase reversal and overload protection etc. Latest high advanced Global Technology of microprocessor based lifts controller.

11. AC.V.F. DRIVE SYSTEM:-

The ACVF Drive system has a rectifier that convert the line frequency of 50 Hz into a constant voltage with variable amplitude and variable frequency. This supply voltage drives an asynchronous motor. By continuously varying the frequency and amplitude of motor supply voltage, the speed and torque of the drive motor is constantly regulated.

12. CAR DOOR (AUTOMATIC):-

Provide with top hung steel collapsible gate, which runs on ball bearings, and is arranged with a special bottom track made of aluminum. Electric contact to meet the requirement of safety, so that the lift will not move unless the door is closed.

13. LANDING DOOR (AUTOMATIC):-

Each landing entrance is provided with a MS Swing door fitted with ball bearing roller. An electromechanical lock designed to prevent the car being moved until door is opened. With this system, unless the car is opposite floor level landing door will not open.

14. RETIRING CAM :-

Will be mounted on the top of the car & will be in electromagnetic solenoid. This is facilitated to avoid any rubbing noise in the hoistway during the lift travel and will operate gates when the car is idle at the opposite landing. By this nobody can open the landing gate when the lift is on other landing.

15. WIRING :-

We shall be used only cooper wire of appropriate size for different circuits. All wiring done in the trunching from machine room to half way junction box necessary tapping will be taken to the landing boxes and locks by means of flexible conductors with suitable lugs.

16. LANDING OPERATING PANEL:-

Flush mounted in the wall with one button to call the lift, up-down direction indicators.

17. CAR OPERATING PANEL:-

This panel is flush mounted in the car incorporated with floor buttons, emergency alarm, stop button, position indicators etc. depending upon the operation.

18. FINAL LIMITS :-

This will be provided on two extreme landing in the hoist way to stop the lift from hitting the buffers and the roof of the hoist way.

19. ELECTROMAGNETIC BRAKES:-

The electromagnetic brakes are operated on a drum on the worm shaft. Generally formed by the two halves of the face plate coupling between the worm motor shafts & applied by a strong compressing spring. The brakes shoes will be faced with best quality material and will be arranged to take up wear & tear automatically when occurs, so that adjustment of the brakes are necessary only for long intervals.
